1. Context and purpose

This document comprises the Modern Slavery Statement (**‘Statement’**) of REI Superannuation Fund Pty Ltd (ABN 68 056 044 770) the trustee of REI Super (76 641 658 449).

The Act defines “modern slavery” as including the following eight types of serious exploitation:

- trafficking in persons
- slavery
- servitude
- forced marriage
- forced labour
- debt bondage
- deceptive recruiting for labour or services, and
- the worst forms of child labour

The purpose of this Statement is to detail the activities we have undertaken in relation to modern slavery risks in our operations and supply chains, and our approach to this commitment for the financial year ended 30 June 2021.

Whilst we have not identified any specific instances of modern slavery harm, we have applied a methodology (described below) to undertake a risk-based assessment of our operations (including our investment operations) and supply chains and identify any areas of potential for a higher incidence of modern slavery risk.

2. Reporting entity structure, operations and supply chains

3. Identifying risks of modern slavery practices in operations and supply chains

The steps we are taking to identify risks of modern slavery practices in operations and supply chains are as follows:

Step 1 Identification of Suppliers in our supply chain which include

- Custodian services
- Insurance including the provider of group Insurance for our members
- Investment Manager/s
- IT equipment, software and hardware
- Real estate and property management services
- Professional services
- Consultancy services

- Payroll & accounting services
- Banking services
- Maintenance services
- Marketing, media and related advertising and design services
- Operational services, including Fund Administration

- Utilities

Step 2 Identifying risk factors. The following risk factors have been considered when developing the risk matrix:

- Country or region where the supplier operates
- Industry or sector in which the supplier operates
- Product or service that the supplier provides, and
- The supplier itself

Our service providers and suppliers are based in Australia and operate in lower risk industries such as financial services and professional services. Accordingly, the risk of modern slavery in these services is likely to be low. We have identified a service provider who has operations in a higher risk country (India) however, they are a professional services provider who do not work in an industry where modern slavery is prevalent, and their operations involve highly skilled work. For these reasons, we believe the risk of modern slavery is low.

Our legal agreements with our major suppliers prevent them from subcontracting activities offshore without our knowledge and consent.

Step 3 Attribute risk factors to each supplier for example, reviewing contracts and reaching out to suppliers to complete a questionnaire.

Step 4 Allocate a risk rating to each supplier.

4. Actions taken to assess and address these risks, including due diligence and remediation processes

We have commenced steps under section 3 in 2021, and will continue to enhance our processes, to prevent, mitigate and remediate modern slavery through our operations and supply chains.

An overview of the measures we have in place to assess and manage modern slavery risk are the following:

- Reviewing internal policies
- Reviewing supplier engagement processes
- Reviewing material suppliers' quarterly compliance attestations
- Risk management framework

The Board has the following approved policies in place:

- ESG Policy
- Breach and incident procedures
- Inquiries & Complaints Policy

- Conducted training for new staff which encompasses risk and governance
